## Summary

### Building Seamless Web Experiences - Full Stack and Agile

A passionate and results-driven Full Stack Developer with 3 months of internship experience and a strong foundation in agile methodologies.

Leveraging expertise in JavaScript, Node.js, MongoDB, and various JavaScript libraries, I design, develop, and deploy full-stack web applications that are robust, user-friendly, and efficient. My 8+ live projects showcase a hands-on approach and a deep understanding of both front-end and back-end development principles.

I am eager to contribute my skills and collaborate within a fast-paced development environment.

## Education

### K.K.Wagh College, Nashik

Bachelor of Computer science  
7.4

April 2019 - Oct 2022

BCS

## Experience

### BWS - Business Web Solution

Intern

Jan 2024 - March 2024

Remote

BWS Solutions was awesome! Their onboarding program kicked butt, and I got to dive into front-end stuff (HTML, CSS, JS) right away. Leveled up my skills with React to make those web pages super smooth. Then I jumped over to the back-end (Node.js, Express, MongoDB) and learned how to build the brains behind the websites!

## Skills

### React

React.js, Redux, Tailwind Css

### Node

Node.js, Express.js, socket.io

### NoSQL

MongoDB, cosmosDB, sharding

### Next.js

server side rendering, SEO, App routing, Client side rendering

### SQL

MsSQL, MySQL, PostgreSQL

### Git

Github, Version Control

## Projects

### Form Builder AI

 <https://ai-form-builder-riteshpatel.vercel.app/>

Jun 2024 - Jun 2024

Built a user-friendly AI-powered form builder SaaS app using Next.js & React with TailwindCSS. Integrates Gemini API for AI-assisted form generation and Clerk for secure user management. Users create and share custom forms with ease.

React, Next.js, Clerk, Stripe, shadcn UI, Gemini AI, REST API

### Memories

 <https://memories-app-six.vercel.app/>

May 2024 - May 2024

Built a "Memories" app to capture and share life's moments - kind of a digital scrapbook! Used React and friends on the front-end for a smooth experience, and Node.js with MongoDB on the back-end to keep all those memories safe.

React, Redux, Node.js, Express.js, MongoDB

### Chatyard

 <https://chat-yard-riteshp2008.vercel.app/>

Apr 2024 - Apr 2024

Built a chat app that lets you message friends in real-time, kind of like a supercharged group text. It's all decked out with secure logins and a clean interface, thanks to some awesome tech (MERN stack and Socket.io for the curious).

React, Node.js, Express.js, MongoDB, socket.io

Udemy

 [Certificate](#)

Crammed 60 intense hours into a web development bootcamp and emerged with some serious coding skills! Now I'm a front-end whiz, wrangling HTML5, CSS3 (Flexbox, Grid, Bootstrap 5, you name it!), and JavaScript (ES6, DOM manipulation, jQuery) to build interactive interfaces.

But wait, there's more! I can handle the server-side too, thanks to Node.js, Express.js, and EJS. Plus, I understand how to connect to databases (SQL, PostgreSQL) and make REST APIs dance.

This bootcamp was a whirlwind, but it equipped me with a diverse skillset for both front-end and back-end development. Bonus points for web design knowledge and deploying projects with GitHub Pages like a pro! Let's collaborate and build something epic!
